Образец задания для текущего контроля

Read and translate the text. Answer the questions.

Most functions performed by the monarch in Britain are carried out on the advice of the Prime Minister or other ministers.

A central power still possessed by the monarch is the choice and appointment of the Prime Minister. By convention, this person is the leader of the political party, which has a majority in the House of Commons. However, if there is no clear majority or if the political situation is unclear, the monarch could in theory make a free choice.

Constitutionally, the monarch has the right to be informed of, and advised on, all aspects of national life by receiving government documents and meeting regularly with the Prime Minister. The monarch also has the right to encourage, warn and advise ministers.

The monarch is a permanent fixture in the British political system unlike temporary politicians, and often has a greater knowledge of domestic and international politics. Its practical and constitutional importance is illustrated by provisions for the appointment of counsellors of state (or a regent in exceptional cases) to perform royal duties, should the monarch be absent from Britain or unable to carry out public tasks.

Traditionalists fear that a modernized monarchy would lose its main strengths. At present it balances between tradition and modernizing trends.

Answer the following questions:

1. What is the Queen's main authority?
2. What rights does the Queen possess?
3. ~~What is the Queen's main authority?~~

THE LEGAL SYSTEM IN THE UNITED KINGDOM

The study of law distinguishes between public law and private law, but in legal practice in the UK the distinction between civil law and criminal law is more important to practising lawyers. Public law relates to the state. It is concerned with laws which govern processes in local and national government and conflicts between the individual and the state in areas such as immigration and social security. Private law is concerned with the relationships between legal persons, that is, individuals and corporations, and includes family law, contract law and property law. Criminal law deals with certain forms of conduct for which the state reserves punishment, for example murder and theft. The state prosecutes the offender. Civil law concerns relationships between private persons, their rights, and their duties. It is also concerned with conduct which may give rise to a claim by a legal person for compensation or an injunction ± an order made by the court. However, each field of law tends to overlap with others. For example, a road accident case may lead to a criminal prosecution as well as a civil action for compensation.

The head of state is the monarch, currently the Queen in the UK, but the government carries the authority of the Crown (the monarch). The Westminster Parliament has two chambers: the House of Lords and the House of Commons, which sit separately and are constituted on different principles. The Commons is an elected body of members. Substantial reform is being carried out in the upper house, the House of Lords, where it is proposed that the majority of members be appointed, with a minority elected, replacing the hereditary peers. There is no written constitution, but constitutional law consists of statute law, common law, and constitutional conventions.
